- ☒ Normal heart sounds, no audible murmur _____
☐ Soft murmur, grade 1 or 2 _____
☐ Moderate or loud murmur, grade 3 or louder _____

Opinion:

- ☒ Normal cardiac examination; no evidence of congenital heart disease.
☐ Equivocal cardiac examination; congenital heart disease can neither be diagnosed nor excluded based on this exam.
☐ Abnormal cardiac examination; congenital heart disease may be present.
☐ Re-examination recommended: ☐ Immediately ☐ Six months ☐ One year ☐ Two years ☐ After one year of age
☐ Cardiac work-up with Doppler echocardiogram by a board-certified veterinary cardiologist.
☒ No further examination required unless auscultation findings/clinical signs change.
